PREFACE

The free-floating subdivisions used in Library of Congress subject headings appear in thirty-five separate lists in the *Subject Cataloging Manual: Subject Headings*. This index, compiled by the Cataloging Policy and Support Office, is a consolidated alphabetical listing of all free-floating subdivisions in the manual as well as newly-approved free-floating subdivisions not yet published in the manual. The first edition of the index was published in 1989. Subsequent editions have been published annually. This eighteenth edition includes subdivisions approved through December 2005.

This list should be used as an index to the manual by those who wish to assign and retrieve free-floating subdivisions.

Barbara B. Tillett
Chief, Cataloging Policy and Support Office

January 2006

100-10000-10000

The first thing I noticed when I stepped out of the plane was the cold air. It was a relief after the warm air of the plane. I was in the middle of the desert, and the only thing I could see was the horizon. The sun was low in the sky, and the shadows were long. I was alone, and I was in the middle of nowhere. I was in the middle of the desert, and the only thing I could see was the horizon. The sun was low in the sky, and the shadows were long. I was alone, and I was in the middle of nowhere.

INTRODUCTION

This list consists of all free-floating subdivisions that appear in H 1095 - H 1200 in the current edition of the *Subject Cataloging Manual: Subject Headings*, and serves as an index to the free-floating subdivisions in that publication. This eighteenth edition of the list is up to date through December 2005.

For each subdivision, a listing is provided of the free-floating lists in the manual where it appears, identified by category. Since the subdivisions that appear in H 1095 have no single, identifiable category, the user is directed, by the notation "see *SCM:SH*," to consult H 1095 in the *Subject Cataloging Manual* to determine appropriate usage. For subdivisions that have specific instruction sheets in the manual describing their usage, citations to these are provided in the column labeled "USAGE GUIDELINES IN *SCM:SH*."

The list includes a column providing the MARC 21 subfield codes that apply to each subdivision. The Library of Congress began applying subfield code **v** to form subdivisions in 1999. It should be noted that most subdivisions identified as form subdivisions and coded **v** in this publication may also be assigned as topical subdivisions to works that are about those bibliographical forms. In such cases, the subdivisions are coded in the bibliographic record as **x** rather than **v**. The coding provided here represents Library of Congress cataloging practice. Some subdivisions that may appear to be form subdivisions (such as **–Manuscripts**, **–Personnel records**, or **–Poetic works**) are coded **x** because the Library of Congress assigns them only to works that are *about* the form rather than to actual individual instances of the form. Other subdivisions that may appear to be topical (such as **–Congresses**, **–Identification**, or **–Pedigrees**) are coded **v** because the Library of Congress uses these subdivisions primarily to designate bibliographical forms (such as conference proceedings, identification guides, or pedigree books). The Library has made the decision to consistently treat certain problematic subdivisions such as **–History**, **–History and criticism**, and **–Law and legislation** as topical and always to code them **x**. A full explanation of the distinctions between topical, geographic, chronological, and form subdivisions is provided in the *Subject Cataloging Manual: Subject Headings*, 5th edition, H 1075, *Subdivisions*.

This list should be used with caution and only in conjunction with the *Subject Cataloging Manual*. After locating a subdivision in the list, it is usually necessary, particularly for those subdivisions listed in H 1095, to consult the manual to determine restrictions on its usage in specific situations. These are found in footnotes or scope notes on the free-floating lists in the manual or in an instruction sheet that provides usage guidelines. Restrictions of this type are not indicated in this list.
